Loop definition: Loop_03 collects information about the ways person purchased health insurance (Insurance categories at HX03) associated with a self-employed job with firm-size = 1. The first cycle of this loop collects the main way person purchases insurance. Subsequent cycles collect additional ways person purchases insurance.

The response at HX04 determines whether the loop cycles again. If HX04 is coded '1' (yes), the loop cycles to collect the next insurance category. If HX04 is coded '2' (no), '-7' (refused), or '-8' (don't know), the loop ends.
