FEATURES OF THE SOURCE OF PAYMENT MATRIX:

1. Interviewer uses right and left arrow keys to move to either the percent or dollar amount column associated with that source. Interviewer uses the up and down arrow keys to move between sources.

2. Source column is protected. Cursor will not enter this column, so no changes are allowed to sources at this screen.

3. Interviewer enters either a dollar or a percentage amount for each source displayed. Amounts can be changed as many times as necessary before the interviewer leaves the screen.

4. The person/family amount paid columns may be changed or corrected. Note that the screen will require an amount for person/family in the dollar column in order to proceed. This dollar amount may be entered by the interviewer or calculated by CAPI based on % of total charge where total charge is known.

5. When cursor leaves the cell and a dollar or percentage amount has been entered and there is a total charge, the reciprocal amount will be displayed. For example, if the interviewer enters a percentage, the dollar amount will be calculated using the total charge. This dollar amount would then be displayed in the dollar amount paid column (next to the percent amount paid column).

6. If a source is entered in error, the interviewer will zero out the amount paid.

7. Interviewers will be instructed to only enter direct payments made to the provider at this screen.
